

KENNETH M. ANDALLAZA

BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY

Tubod, Carmen, Davao del Norte | andallazawrk@gmail.com | 09126458081 | <https://andallazaport.wasmer.app>

PROFESSIONAL SUMMARY

Recent Information Technology graduate with hands-on experience developing web applications through academic and personal projects. Knowledgeable in JavaScript, Python, SQL, Git, object-oriented programming (OOP), and the software development lifecycle (SDLC). Familiar with API development, debugging, testing, version control, and AI-assisted development tools. Strong analytical, problem-solving, and collaboration skills with a keen attention to detail and a willingness to learn new technologies while contributing to high-quality software solutions.

PROFESSIONAL EXPERIENCE

City Government of Tagum

February 2026 - May 2026

Front End Developer - Intern

- Engineered responsive UI components using Vue.js and Quasar framework, enhancing user experience and streamlining website functionality.
- Contributed to the development of a Leave Monitoring System, improving employee leave tracking efficiency and administrative processes.
- Collaborated in cross-functional teams to ensure project milestones were met on schedule, fostering teamwork and communication.

Project-Based | Remote

WordPress Web Designer (Divi Builder)

March 2021 - June 2021

- Designed and developed responsive websites using WordPress and Divi Theme Builder, aligning layouts with client specifications.
- Customized layouts, components, and content to meet diverse client requirements, enhancing client satisfaction.
- Optimized website performance, significantly improving load times and mobile responsiveness, leading to increased user engagement.

PROJECTS

One Tagum Vision: GIS-Driven Platform for Project Monitoring and Visualization

Programmer / Web Developer

- Developed a GIS-powered platform for tracking and visualizing government projects, improving transparency in project management.
- Integrated mapping and project monitoring functionalities to streamline data visualization for stakeholders.
- Supported data-driven decision-making through sophisticated visualization tools and detailed reporting functionalities.

Leave Management System

Frontend Developer

- Built a web-based leave management platform to automate employee leave requests, enhancing operational efficiency.
- Reduced manual processing through centralized digital records, improving accessibility and accuracy of employee leave information.
